

We are excited to announce that we are implementing an electronic health record next year here at Noble Local Schools. SchoolDoc.com is the leading electronic health record system for schools. It is an easy-to-use system to manage demographic and health forms, allergies, medications, and illness/injury tracking throughout the school year.

It will provide school staff instant access to vital medical information and help keep safety in the forefront of school operations. This system will be very beneficial to parents/guardians because it will reduce the amount of forms that need to be completed each year and will help with continuity of student information.

As part of the registration process, we will be collecting email addresses for parents/guardians. This email address is how you are going to be contacted to complete and manage forms for your child. Each student will need at least one email contact for his or her mother, father, or guardian.

We will not be completing paper forms next year for this information (such as the emergency medical form, etc.), an email address is required!

Please complete the form below and return to the school office or contact the school to provide us with your email. If you do not have an email address, NLSLSD will be happy to assist you with this and the set-up of your account at the start of the 2018-19 school year.

Student Name: _____

Grade: _____

Parent/Guardian Name: _____

Email address: _____
